

## ELECTRICAL APPRENTICESHIP

An electrical apprenticeship is a job that combines both work and structured training. On completion, you will have a nationally recognised qualification.

**electrogroup** Apprentices are highly sought after.

**No HECS debt!**

### > Support

**electrogroup** Apprentices enjoy all the benefits of full employment, including wages, allowances, income protection and superannuation.

You will be provided with a uniform, comprehensive Personal Protective Equipment (PPE) and tool kit.

You will receive the best training available, mentored and supported by experienced and highly specialised Field Officers.

### > Earn as you Learn

A career in a dynamic industry for the 21st Century.

As you progress through your Apprenticeship your wages increase.

You do not have a HECS debt when you complete your apprenticeship.

### > Flexibility

You will have the opportunity to work across a range of industry areas while completing your apprenticeship.

**electrogroup** has a large number of industry hosts to ensure you are employed in a variety of exciting and interesting roles.

### > Paid Holidays

While completing your Apprenticeship you will be treated like a regular employee with all the benefits.

Unlike doing a University course you won't have to work on your break from course work.

### > A Career with a Bright Future

The electrical industry is rapidly changing and is increasingly technology-based.

It spans occupations across, automation, communications, computer systems, refrigeration, air conditioning, and security. It involves anything relating to, producing or operated by electricity.

An Electrical Qualification develops your skills, and makes you highly sought after in a world where job markets are becoming more unpredictable.

## > Be at the forefront of future technologies

Electricians are at the forefront of developing new technologies including automation, transport, healthcare, construction, and robotics.

This is the time to be a qualified Electrician.

## > What will I be doing as an Apprentice Electrician? You'll be...

- Undertaking repair and fault finding.
- Testing electronic instruments to trace and diagnose faults.
- Selecting, cutting and connecting wire and cable to terminals and connectors.
- Connecting electrical systems to power supplies.
- Testing continuity of Circuits.
- Measuring and laying out installations.
- Examining blue prints and plans.
- Position and installing electrical switchboards.

## > Where will I be working?

**electrogroup** apprentices are highly sought after for the most interesting and challenging projects. You'll be working across many of these industries...

- Construction.
- Solar & Renewables.
- Telecoms & Data.
- Fire.
- Electricity, Gas, Water and Waste Services.
- Commercial and Domestic services.

## > A Career with a Bright Future

Your Apprenticeship will be very rewarding, and at times demanding. Once you've finished your Apprenticeship, you'll have a world of options open to you.

Having industry experience is very important when getting your first job as a fully qualified Trades Person. **electrogroup** gives you that experience.

**electrogroup** Apprentices are highly sought after.
